Question: 6

A company has an Active Directory Domain Services (AD DS) domain. Portable client computers connect to the corporate wireless network.
You have the following requirements:
• Prevent users from configuring a wireless network by using settings from a USB flash drive.
• Do not affect the use of other USB devices.
You need to create a Group Policy object (GPO) to meet the requirements. Which GPO should you create?

A. A GPO that disables the Allow only USB root hub connected Enhanced Storage Features policy setting.
B. A GPO that enables wireless policy processing.
C. A GPO that prohibits connections to mobile broadband networks when roaming.
D. A GPO that configures Windows Connect Now settings.

Answer: _____

Question: 7

A company has an Active Directory Domain Services (AD DS) domain. Client computers use Window BitLocker Drive Encryption with a Trusted Platform Module (TPM) chip. You need to create a Group Policy object (GPO) that will secure the TPM owner information. Which policy setting should you configure?

A. Enable the Turn on TPM backup to Active Directory Domain Services policy setting.
B. Enable the Configure the level of TPM usage authorization information available to the registry policy setting.
C. Set the Configure the level of TPM owner authorization information available to operating system policy setting to Full.
D. Enable the Configure TPM platform validation profile policy setting.

Answer: _____
